## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product performs, if applicable. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 10,000 EUR will be invested.

	If you exit after 1 year	If you exit after 4 years
<b>Total costs</b>	624 EUR	1,212 EUR
<b>Annual cost impact (*)</b>	6.2%	2.7% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.8 % before costs and 2.1 % after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
